The 1252 Combo System starts with the patented, certified scale prevention system also known as (AMP Force Technology). It is used to break up the minerals in your water. This product eliminates scale build up in your internal plumbing, which prevents your water from damaging your water using appliances making them last longer.

The second part of the system is our certified water filtration system that uses the highest quality water filtration medias providing: great tasting, safer, healthier, better quality water for drinking, bathing and other uses at every tap in your home. The H2o Concepts media will remove chlorine and contaminants from the water at every tap and shower in your home or business.
